

Welcome!

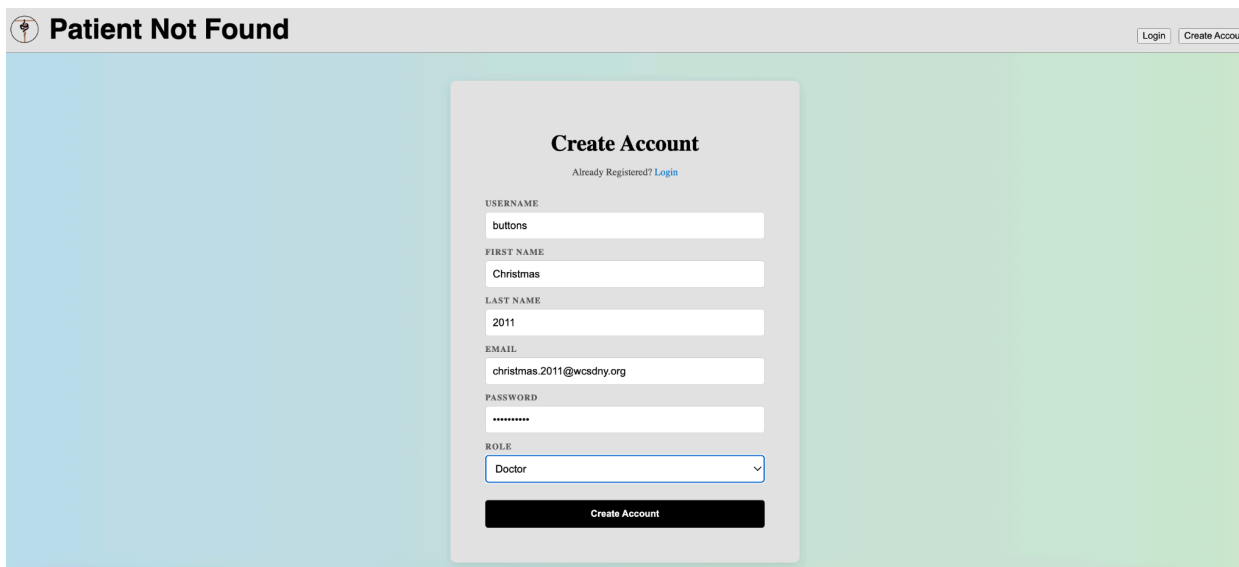

Thank you for considering Patient Not Found, a Patient Information Summarizer and Redactor program.

1. Getting Started

Before you can create summaries, you must create an account. First, head to the login page. Since you may not have created an account yet, press the “[Create Account](#)” link underlined below the login button.

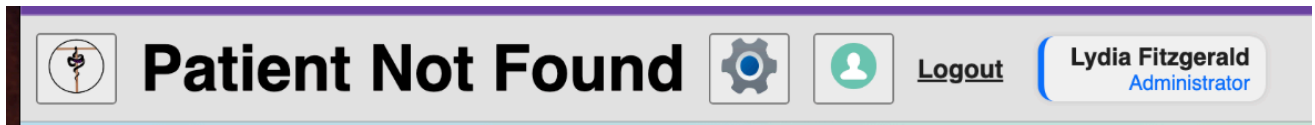

Fill out the required fields in the [Account Creation](#) page. Fields include Username (must be unique), First Name, Last Name, Email, and Password. Before clicking “[Create Account](#)”, please select a role.

A screenshot of the "Patient Not Found" account creation page. The page has a light blue header with the "Patient Not Found" logo and name on the left, and "Login" and "Create Account" links on the right. The main content area has a light green background. In the center, there is a white form titled "Create Account". Below the title is a link that says "Already Registered? Login". The form contains several input fields: "USERNAME" with the value "buttons", "FIRST NAME" with the value "Christmas", "LAST NAME" with the value "2011", "EMAIL" with the value "christmas.2011@wcdny.org", and "PASSWORD" with masked characters. Below these fields is a "ROLE" dropdown menu currently set to "Doctor". At the bottom of the form is a black button with the text "Create Account".

Once you have created an account, you will be redirected to the [Login](#) page. Enter your username and password, and press the “[Log In](#)” button.

2. Navigation Bar

Have you just created an account? Splendid. Now it's time to get familiarized with the User Interface. Don't worry, it is simple enough for anyone to remember.

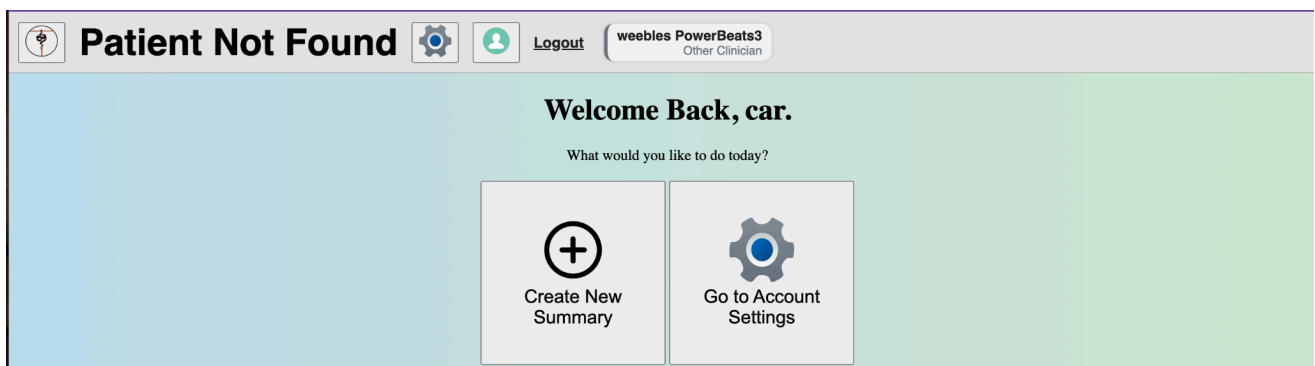

On the top left is the **Home Button**. When you leave the **Home Menu**, this is your way back to it.

To access the **Account Settings** Menu, click on the **Gear** icon.

If you want to log out of the application, click “**Logout**”, underlined in black.

3. Home Menu

Depending on your role, you may see two or three big buttons on the **Home Menu**. For standard Users, you have two buttons: “**Create New Summary**”, and “**Go to Account Settings**”.

Account Settings works the same way as the **Account Settings** button on the Navigation Bar. The Create New Summary button redirects you to the summary creation page.

4. Administrator Role

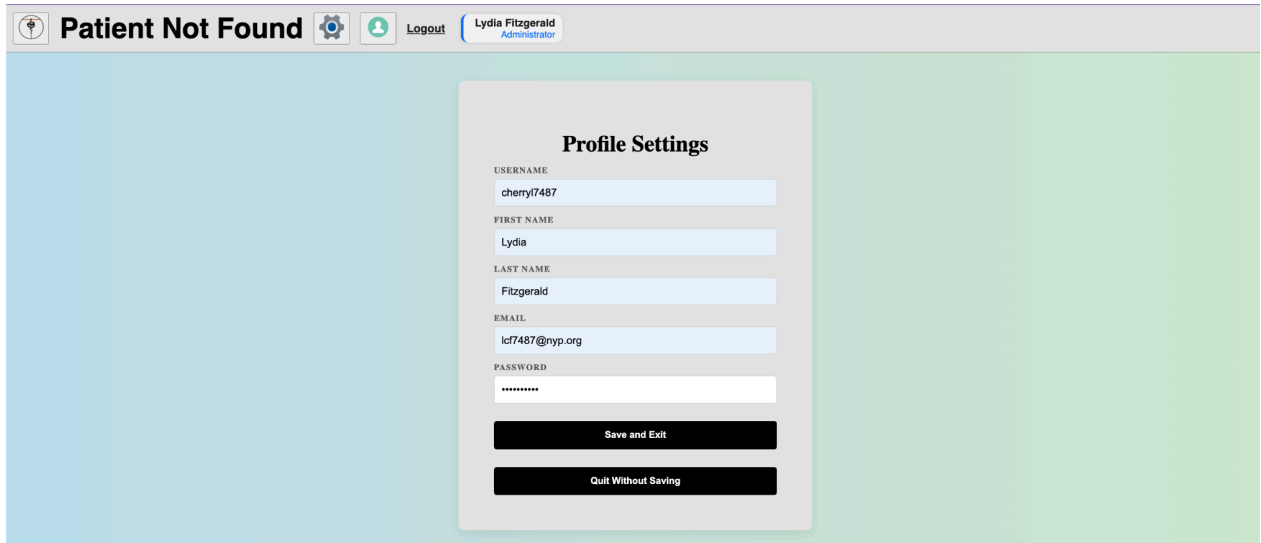

As an Administrator, you will see an extra button on the **Home Menu**. The **Admin Dashboard** allows you to see who logged into the program.

5. Account Settings

Made a mistake while creating your account? The **Account Settings** page makes editing your user profile a breeze. Simply click on the credential you need to change, and enter a new value in the field. If you want to save your changes, click “Save and Exit” to save your new credentials. Please note that changing your username and/or password will require you to use those credentials next time you log in.

If you do not want to save any changes you’ve made to your account, click “Quit Without Saving.”

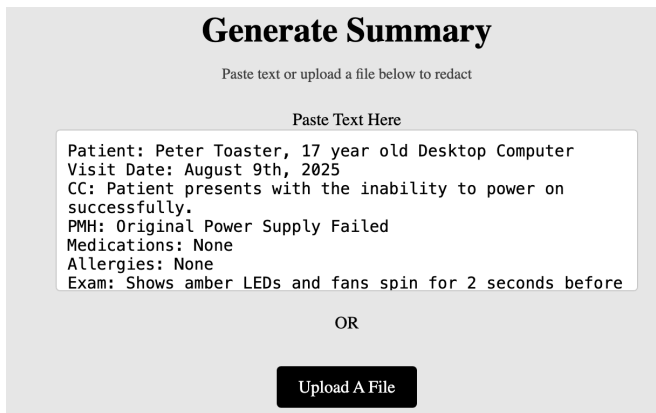

The screenshot shows a web application interface. At the top, there is a navigation bar with a "Patient Not Found" button, a settings gear icon, a user profile icon, a "Logout" button, and a user name "Lydia Fitzgerald" with the role "Administrator" below it. The main content area has a light blue and green background. In the center, there is a "Profile Settings" form. The form contains the following fields: USERNAME (cherry7487), FIRST NAME (Lydia), LAST NAME (Fitzgerald), EMAIL (lcf7487@nyp.org), and PASSWORD (masked with asterisks). Below the fields are two buttons: "Save and Exit" and "Quit Without Saving".

6. Summary Creation

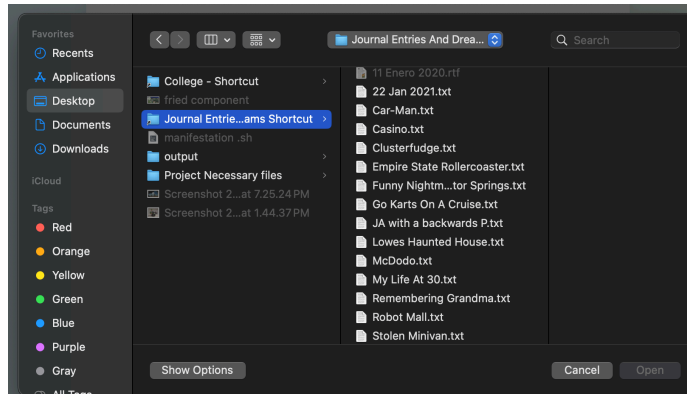

Now that you’ve mastered navigating the User Interface, you are now ready to create summaries. To create a summary, simply paste text into the “Paste Text Here” input field. Alternatively, you can upload PDF or DOC files and summarize them that way.

Pasting Text Into Text Box

The screenshot shows a web application interface for generating a summary. The title is "Generate Summary". Below the title, there is a instruction "Paste text or upload a file below to redact". There is a text box labeled "Paste Text Here" containing the following text: "Patient: Peter Toaster, 17 year old Desktop Computer", "Visit Date: August 9th, 2025", "CC: Patient presents with the inability to power on successfully.", "PMH: Original Power Supply Failed", "Medications: None", "Allergies: None", and "Exam: Shows amber LEDs and fans spin for 2 seconds before". Below the text box, there is an "OR" label. At the bottom, there is a button labeled "Upload A File".

Uploading File From Computer

When you're done pasting or uploading files to the page, simply click the "[Redact PHI](#)" button. Your summary should begin generating in a few seconds. Once the summary is finished generating, you can read the summary and download it to your computer as a PDF or DOC file. If you are not satisfied with the result, click "[Edit Summary](#)" to edit the generated summary.

Redacted + Summary Output

Summary:

Patient is a 17-year-old presenting with power-on issues. Assessment indicates motherboard failure due to original power supply malfunction. Plan includes purchasing a new motherboard and conducting further testing.

7. Summary Editor

If you are not satisfied with the summary generated by the **Summary Generator**, the built-in **Summary Editor** allows you to edit the summary within your browser.

To begin, click on the part of the text that you would like to edit. Simply start typing, or use the mouse or keyboard keys to move the cursor to another part of the text.

Like the **Summary Generator** page, you are able to download the edited text as a PDF or DOC file. If you are not satisfied with your changes and would like to start over, click the “Undo Changes” button.
