Using The Summarizer

1. Log into Patient Not Found with your username and password.
Click the “Log In” button to log in and redirect to the Home Menu.

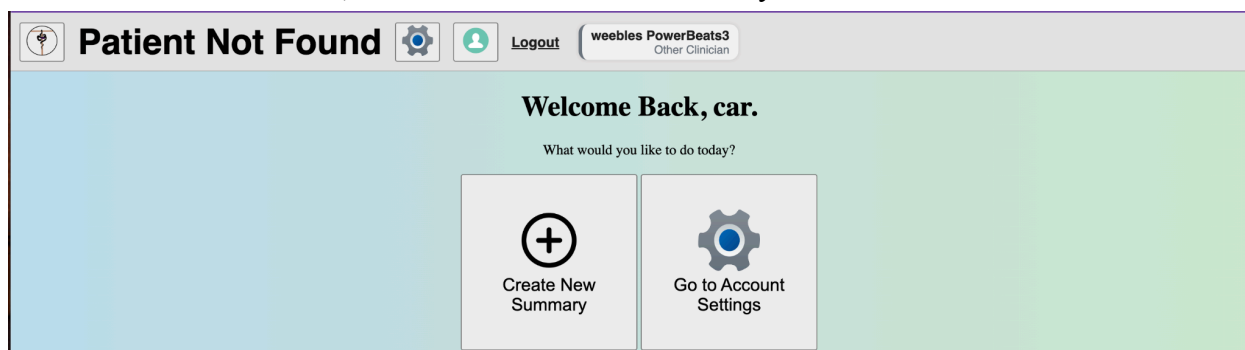

The screenshot shows a web browser window with a purple address bar. The browser tabs include Bricklink, Home - Moparlini..., YouTube, News, Translate, RedShelf, and VitalSource Books... The browser address bar shows a URL. The main content area has a light blue background with a green vertical stripe on the right. At the top, there is a header with a medical icon and the text "Patient Not Found". Below the header, there is a white login box with a grey border. The box has a title "Login" in bold. Below the title, there are two input fields: "USERNAME" with the value "cherry17487" and "PASSWORD" with a masked password "*****". Below the input fields is a black button with the text "Log In" in white. Below the button is a link "Don't Have An Account? [Create Account](#)". At the bottom of the page, there is a small copyright notice "(C) 2025 Patient Not Found".

2. Read the HIPAA warning carefully, and dismiss the message by clicking “Accept and Continue.”

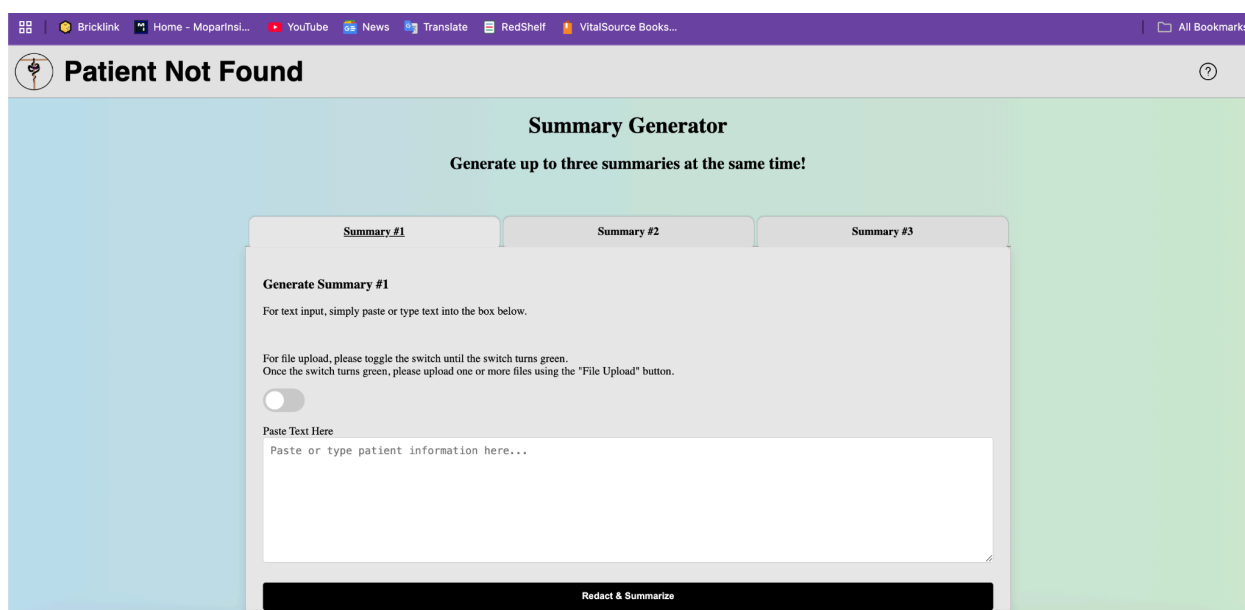

The screenshot shows a web browser window with a light blue background and a green vertical stripe on the right. A white warning box with a grey border is centered on the page. The box has a title "Attention Users!" in bold. Below the title, there is a paragraph "Before using Patient Not Found, Please read the following:". Below this paragraph is a section titled "What is HIPAA?". The text under this section reads: "HIPAA or The Health Insurance Portability Accountability Act, is an act that was enacted in 1996 in the United States to protect sensitive patient health information (otherwise known as PHI). In this application's case, testing is conducted in a way such that no real patient data is being used. This application is not meant to be used in a real-world scenario, unless it is ironed out. This also means that the data being used to test in this AI-supported summarizer must be synthetic, and has to comply to HIPAA standards (ie. Patient names get redacted). Due to the aforementioned circumstances listed above, this means that you are strongly limited to fake patient summaries in order to test for HIPAA compliance, accuracy, and tests to make sure that functionality works accordingly in a way, such that it does not compromise PHI. Once you're done reading, click "Close and Accept" to dismiss this message." Below the text is a black button with the text "Close and Accept" in white.

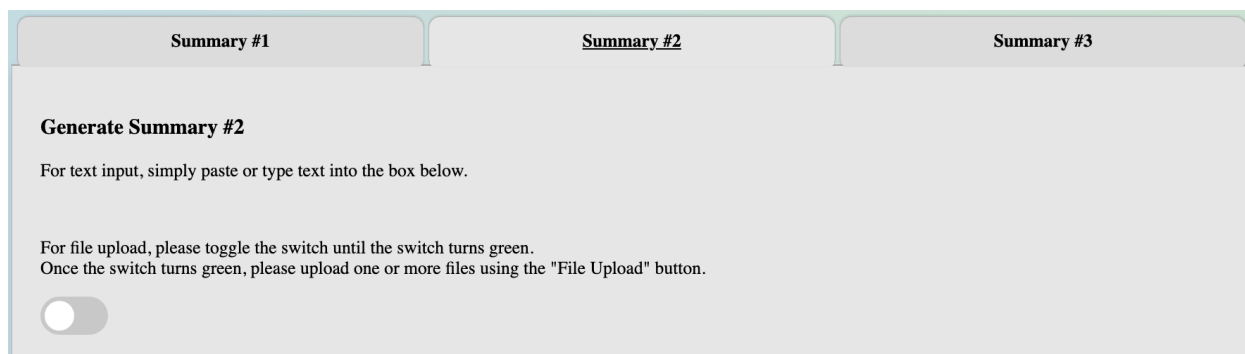

3. In the Home Menu, click the “Create New Summary” button.

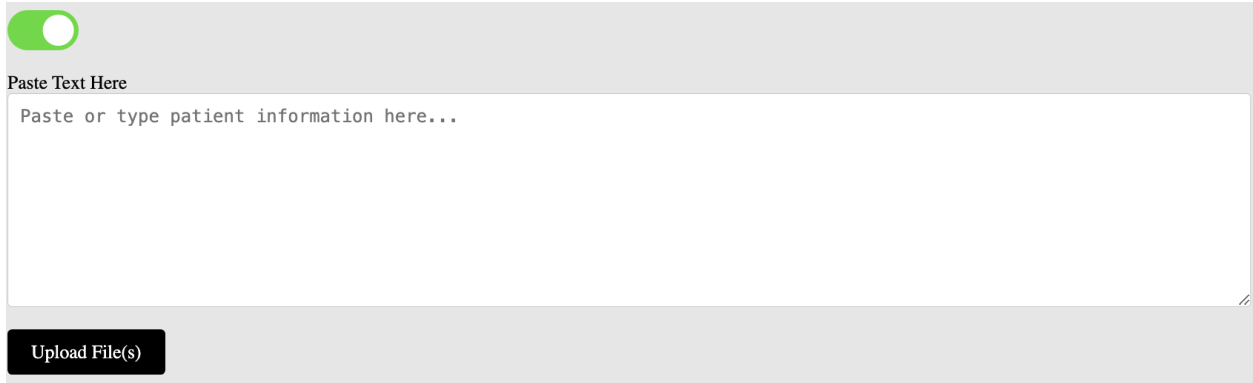

4. You will be redirected to the Summary Generator page.

5. To switch tabs, simply click on the tab you want to navigate to. The current tab that you are on will be underlined.

6. In order to generate a summary, you must upload a file or paste/type in text into the text box. Steps 4 and onward will be the same for each tab.
To upload a file, click the slider until you see green.

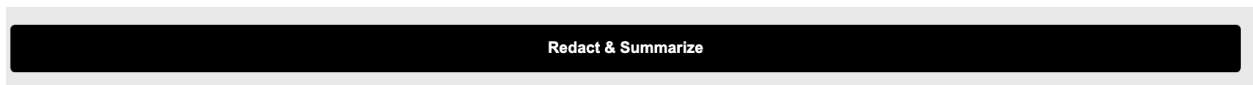

7. To paste in text, the slider has to be switched back to the gray position.

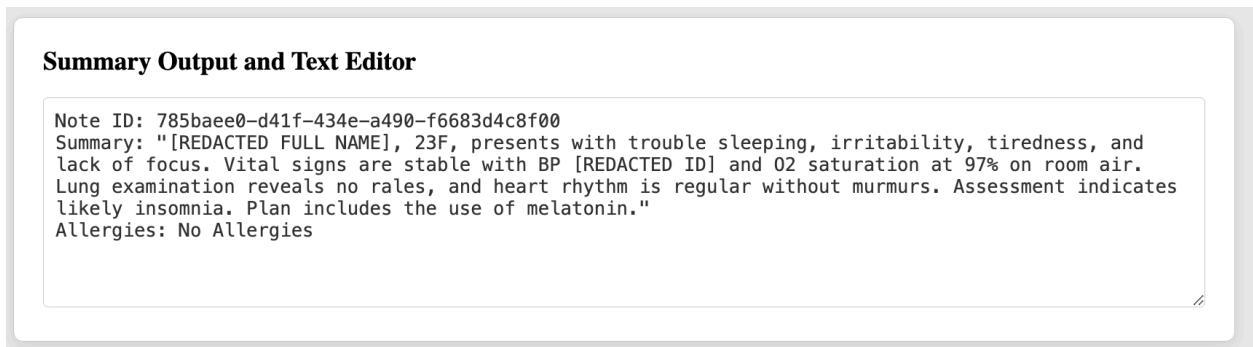

For file upload, please toggle the switch until the switch turns green.
Once the switch turns green, please upload one or more files using the "File Upload" button.

8. Once you are happy with the contents in the text box, click the "Redact & Summarize" button.

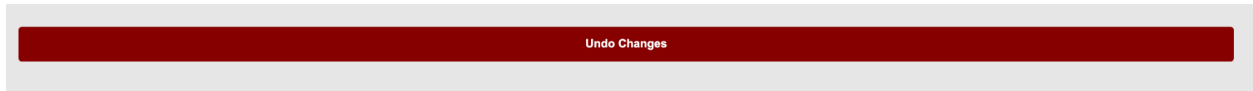

9. Please wait patiently for your summary to be generated. This will take up to 10 seconds for the summary to generate, but actual wait times may vary. A spinning circle will appear on the screen for a few seconds, and disappear when the summary is done loading. Once the summary is finished generating, it will appear in the lower text box.

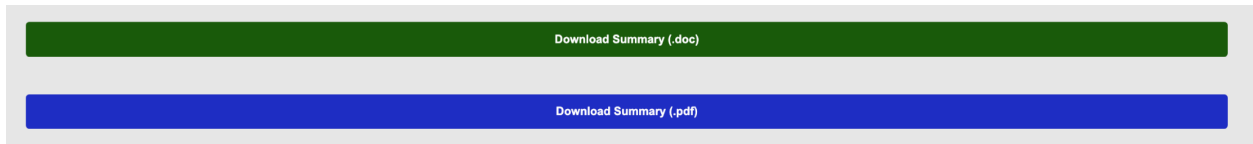

10. Carefully read the summary and ensure that there are no errors or missing information. If you are not satisfied with the generated summary, simply edit the summary in the output box.

11. If you want to undo all of the changes to your summary and want to start fresh, click the “Undo Changes” button to revert the summary back to how it was when it was initially generated.

12. Once you are satisfied with your summary, click either (or both) of the “Download Summary” buttons to save your summary as a PDF, DOC, or both file types.

13. If you want to create more summaries, simply reload the page and repeat steps 3 to 8.
If not, simply go back to the homepage by clicking the Patient Not Found icon or close the browser tab.
